

## Installation and Hardware

WiFiFee has installed both simple and complex wired and wireless networks in hundreds of unique locations. We can design robust and scalable networks in both existing and new construction.

### Installation Services:

- Internal cabling for data, voice, and video
- Fiber optic cable trenching
- Wireless Access Points
- Wireless Point-2-Point and Multipoint
- Networking and Security
- Wired and wireless video surveillance

WiFiFee engineers each one of our locations to meet the needs of each individual customer while also dealing with the uniqueness of their property. We use enterprise-class technology from the following preferred hardware vendors:
