

Looking for a public metro Wi-Fi network or secondary Internet backhauled for emergency response? WiFiFee can help. We've got extensive experience building and managing self-healing mesh networks that provide both public access and backup and emergency Internet for local police and fire first responders.

Mesh network diagram...

### WiFiFee:

- Can build multi-use public and private metro networks
- Enables your municipality to install security cameras where wires can't reach
- Helps you differentiate your high-tech community from the next
- Fully secured and scalable designs
