

Wi-Fi Video Monitoring and Recording

Get peace of mind today and watch over what's most important to you! WiFiFee can create custom solutions to meet every need, from complex indoor/outdoor installations to simple self-installation programs.

- Plans that fit every budget and meet every need; far lower equipment, deployment, and ongoing costs than the competition.
- Perfect for hidden or covert surveillance - indoors or outside, you get crisp and clear video - wirelessly!
- Our solution records to off-site servers and archives automatically.
- Motion-activated recording means that only the action gets captured - no long hours of boring tape to sift through.
- Cameras can be placed ANYWHERE Wi-Fi reaches.
- Enjoy lower insurance costs for your business with video surveillance!

Internet Video Recorder

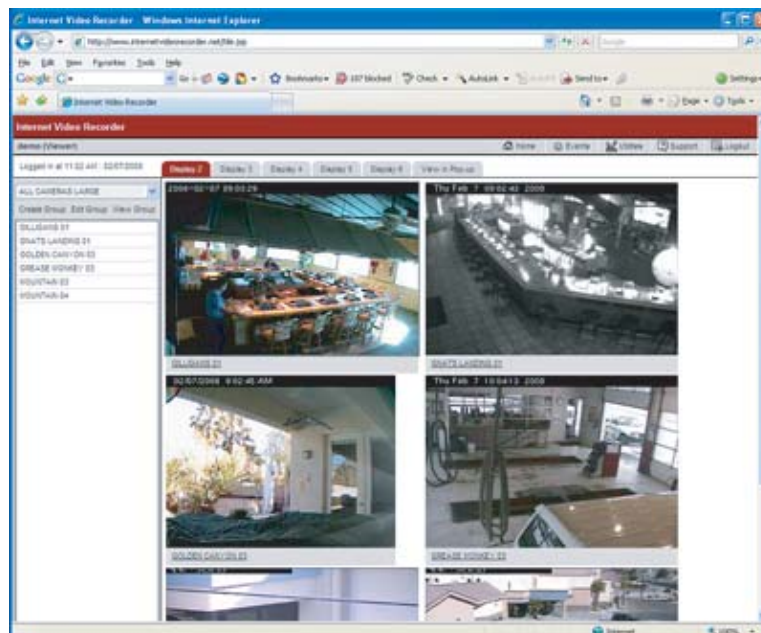

Internet Video Recorder was developed to meet the tough, demanding standards of today's video-centric society, while remaining extremely user-friendly. The software is easy to navigate, control, and locate archived (recorded) video. There is no complicated software to install and manage. All you need is a web browser and a high-speed Internet connection. Visit our website for a demo.

Wi-Fi Video Monitoring and Recording (cont.)
